Best Stuff '07

Sony Vaio NR Series Laptop

\$750
www.sonymystyle.com

A normal laptop under \$800? Chances are it won't include a powerful Intel Core 2 Duo chip, a crisp fifteen-inch wide-screen LCD, or a chassis that has a grippy, fabriclike texture that comes in sophisticated colors like Wenge (that's fancy talk for "brown"). But that's what makes the Sony Vaio NR Series so impressive: Its price may be budget, but its looks and performance are anything but.

My Best Get '07

☞ The coolest thing I got would be a Tomcar. My partner, Richard, gave it to me. It was originally developed for the Israeli army. It's kind of an all-terrain dune-buggy sort of thing. I drive it on my ranch in New Mexico and can get it up to about fifty miles per hour on a dirt road. What color? Black, of course—painted especially for me. ☞
